

West Windsor Selectboard
Draft Minutes
June 8, 2017

Present: Dick Beatty, Win Johnson, Martha Harrison, Mike Spackman, Dan Lesnick (DLX), Katharine Otto (SWCRPC), Chris Yurek (SWCRPC), Chris Bump (AOT, District 4), Alan May (AOT, Better Roads), Scott Jensen (ANR)

This was an informal site visit to confer with the Agency of Transportation (AOT) and the Agency of Natural Resources (ANR) on the best approach to improving the drainage and sight distance on a narrow portion of Silver Hill Road where the streambank is eroding. The consensus of the group was to move the road as far from the streambank as possible, slope it away from the stream and create a vegetated berm between the road and the top of the streambank. Storm water will be directed to a stone-lined ditch on the side of the road away from the stream and then to a culvert, which will be up-sized to handle the increased flow. There is an area of ledge at the west end of the project. The edge of the right-of-way will be staked in that area and the abutting property owners will be notified that the town intends to proceed with work within the right-of-way, as staked. After notification, trees will be removed and the area will be “grubbed” in preparation for Phase 2 of the project, which will occur when funding becomes available.

Respectfully submitted,

Martha Harrison
